

Case for **One of the top automotive suppliers**

Integration of Android and iOS Smartphones with the Vehicle's Head Unit

Comfortable and Safe Smartphone Access Through the Car's Touchscreen

Industry: Automotive

Location: Germany

Employees: 200+

Client Background

Infopulse has been assisting our German customer with the delivery of a smart connectivity system, which links the device with a vehicle in a safe mode. It is completely customizable and compatible with a large range of smartphone applications displayed in their original GUI. The safe in-vehicle mode presents only relevant and essential information on the unit's interface.

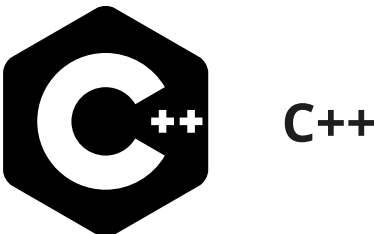

Product and Solution

Infopulse has been assisting our German customer with the delivery of a smart connectivity system, which links the device with a vehicle in a safe mode. It is completely customizable and compatible with a large range of smartphone applications displayed in their original GUI. The safe in-vehicle mode presents only relevant and essential information on the unit's interface.

Features

- Complete and low-effort integration of Android and iOS smartphones with the vehicle's head unit. Windows and other OS support is possible.
- The in-vehicle mode disables unnecessary apps for the trip, blocks unimportant notifications, in-app purchases, software updates, etc.
- The choice of compatible apps includes navigation, weather reports, search for parking, travel assistance, news search, music and video streaming, etc.
- Offline usage and real-time traffic for enhanced navigation experience.

Technologies

Delivered Services

- Requirements analysis
- Architecture and design elaboration
- Development
- Module and unit testing
- System testing

Business Value

- For the end users, the solution brings one-move smartphone integration with the vehicle's head unit allowing a user to stay connected on the go. The in-vehicle mode ensures safe driving experience by blocking irrelevant and distracting messages and notifications.
- With our dedicated and highly professional team of developers and testers, the customer achieved in-time delivery of the main system features and streamlined the whole development process.
