

Case for **Accounting and Payroll Software Leader**

Treasury Management Solution for Accounting Software Leader

Legacy Treasury Management System Modernized for 2,000+ Enterprises, Saving €8+ Million

Industry: Software & Hi-Tech Location: Global Employees: 12,000+ (global)

Client Background

Infopulse has performed a full-scale modernization of the client's outdated treasury management software by reengineering 1 million lines of legacy code. The upgraded system is now utilized by 2,000+ customers worldwide, including world-class brands like American Express, France Telecom, SNCF, UNEDICS, Sephora, Carrefour, and L'Oréal.

Business Challenge

Our customer was looking to update their technologically outdated solution for treasury management. The software was used by multiple corporate clients around the world and had to be updated urgently.

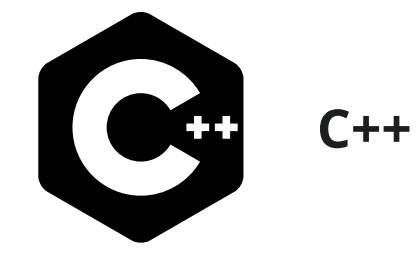

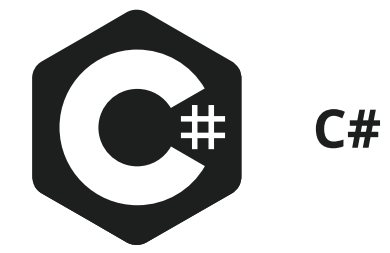

- Infopulse needed to modernize about **1 million lines of legacy code in VB6**, improve the product's usability, and add new features.
- It was critical to ensure the smooth migration of existing customers to the new generation of software.

Solution

The cooperation between Infopulse and our client started in 2002. Infopulse designed a roadmap to ensure a smooth transition and successfully modernized legacy treasury management software in a number of stages, bringing it to a modern tech stack. Since then, Infopulse has been supporting our client for almost 20 years now:

- A new generation of software covers all cash management processes: budgeting, risk management, payment facilities, reconciliation, etc.
- Usability of the system was vastly improved. We added new features, fixed all flaws from the legacy code and implemented automated testing.
- Ensured smooth migration of existing customers to the new generation of software.
- Integrated rich data analysis capabilities (Data Warehouse and Data Marts).
- The system provides a modern and highly customizable user interface, localized into 10+ languages.
