

Case for a **Global Audit & Consultancy Company**

Optimized Financial Reporting with Predictive Analytics Solution on SAP HANA

Industry: Professional Services

Location: USA

Employees: 100 000+

Client Background

One of the leading audit and professional services firms that supports clients globally by providing a full range of consulting, risk management, legal, tax, and financial advisory services.

Business Challenge

- Huge volumes of \$10–20K expense reports could not be processed relying on a legacy Policy and Compliance's platform
- Manual, fragmented and uncoordinated business processes could compromise expense tracking, expense anomaly detection, and expense policy compliance

Solution

- Infopulse developed an analytics solution, addressing a number of critical business compliance scenarios with SAP HANA Predictive Analytics.
- Implemented and optimized complex algorithms to process large amounts of data from multiple sources using SAP HANA Predictive Analytics Library.
- Internal audit teams gained valuable insights into hidden data patterns and trends difficult to discern with classical BI methods and tools.

Business Value

- SAP HANA-based advanced trending and predictive analytics solution helped Policy and Compliance auditors detect expense anomalies.
- New analytical tools allowed increasing practitioner awareness and achieve the Firm's overall compliance goals.
