Case for **Cloud Data Company**

Development of Innovative Big Data Integration Software_

Helping large US software vendor deliver innovative products with faster time-to-market

Industry: Software & Hi-Tech   **Location:** USA   **Employees:** 1,000+

Client Background

The client of Infopulse is a US-based market leader in innovative, award-winning software for cloud and big data integration (IPaaS). The company is trusted by over 3,000 global enterprise customers.

Business Challenge

A US Cloud Data Company was looking for an external partner to develop an innovative data integration platform. The requirements were to enable fast development of real-time analytics and big data in the cloud. Moreover, the developed solution had to make optimized hybrid integrations with immediate, flexible, and protected capacity. The integration platform had to result in improved business productivity for the end customers.

Solution

By implementing DevOps best practices and tools, Infopulse developed a stable and effective data integration platform with more than 800 connectors and integration solutions under PaaS control. The solution also included a smooth integration of heterogeneous data from various sources and legacy systems, and the integration with Amazon Web Services (AWS) to enhance the response time and decrease the usage of the resources.

Business Value

The work, which Infopulse has performed for our client, was crucial for enabling the fast development of big data and real-time cloud analytics. The implemented innovative Big Data Integration Platform helped our client to achieve the following:

○ Expert DevOps implementation resulted in quicker time-to-market, faster delivery of features, enhanced product stability, and decreased time spent on deficiency fixing and maintenance.

○ Boosted cross and up-sales, new service sales, and segment offerings.

Eventually, due to the developed solutions, the customer enhanced its value proposition by offering first-class cloud and data integration in combination with traditional applications.
Technologies

J2SE/EE	**OSGi**
Spring DM	**Apache ServiceMix**
JMS	**ESB**
Joram	**JBoss**

Equinox	**EMF**
CXF	**JAX-WS**
WebSphere	**ActiveMQ**
WebLogic Server	**and others**
